3. CAPACITY OF THE TANK (gallons) _____ YEAR INSTALLED _____ AGE OF TANK _____

List any other state or local permits or approvals which are required and their status: _____

ATTACH THE FOLLOWING: (in accordance with Env-Ws 1606.03)

Each registrant of a septage holding tank shall submit a plan that contains the information:

- (1) A locus map which identifies the proposed tank location(s).
- (2) Identification of all access roads and access control measures.
- (3) Identification of all roads, boundary lines, structures within 200 feet of the holding tank location, structures on the property, any easements or rights-of-way which exist on the property, and the buffer zones as specified in Env-Ws 1606.04(d).
- (4) Identification of surrounding land use within 200 feet of the property on which the holding tank is proposed to be located.
- (5) Holding tank(s) specifications, including details of tank and piping design.

DESIGN CRITERIA FOR HOLDING TANKS (in accordance with Env-Ws 1606.04)

- (1) Each tank shall be watertight.
- (2) All piping, valves and connections shall be water tight, accessible and capable of being cleaned.
- (3) All inlet and outlet connections shall be constructed such that no material will leak, spill, or run out of the tank during transfer.
- (4) Except for existing registered tanks, no holding tank shall be located within buffer distances identified in Table 1608 II.
- (5) the aggregate volume of septage holding tank(s), located at a site, facility, or on a permitted hauler's property shall not exceed 10,000 gallons.

Applicant Signature

The applicant(s) must sign the following statement prior to submitting this application. All copies of the application filed with DES must bear the applicant's ORIGINAL signature(s). If the applicant is not an individual, the application shall be signed by an individual duly authorized by the applicant.
